

YOUR ONBOARD SAFE CHOICE

WORLD LEADER IN MARINE FIRE SUPPRESSION TECHNOLOGY

Pre-engineered Fire Suppression System NMG & NMD Series

SB-045-REV-A

Sea-Fire NMG & NMD Fire Suppression Systems are pre-engineered and designed to protect enclosed compartments.

All NMG & NMD systems are manual only operated systems. This feature provides the operator with the capability of pulling a discharge cable which activates the fire system.

Sea-Fire NMG & NMD Fire Suppression Systems are designed to induce minimum atmospheric concentration of 5.85% within the protected compartment.

The Sea-Fire NMG & NMD series cylinder assemblies are equipped with a factory installed pressure switch which is intended for cylinder pressure monitoring and may also be used to control various electrical functions (engine shutdown, air exchange equipment, etc.)

Product features

- Pre-engineered to protect a specific volume of enclosed space
- Manual discharge only via use of a manual pull cable
- System supervisory pressure switch
- Comes with safety pin to arm/disarm manual cable release during inspection/maintenance
- Equipped with bi-directional cable release bracket for ease of install from either side of cylinder
- Made in the U.S.A.

FK-5-1-12 Agent

- People safe at design concentration
- Environmentally responsible (no ozone depletion + GWP (global warming potential) of less than 1)
- Globally accepted
- Not damaging to equipment and machinery
- No clean-up after discharge
- · No forseeable phase-out schedule

Mounting

- NMG 25 to NMG 100 Vertical & Horizontal
- NMD 125 to NMD 825 Vertical & Horizontal
- NMD 850 to NMD 1800 Vertical only

System specifications

- Protects spaces up to 1800 ft³ (51 m³)
- Available in increments of 25 ft³ (0.7 m³)
- NMD models are refillable
- NMG models are non-refillable

Applications include

- Engine Compartment
- Machinery Compartment
- Generator Area
- Electrical Control Room
- Fuel Storage Lockers
- Lazarette

Pre-engineered Fire Suppression System

NMG & NMD Series

Selecting the proper system

- Determine the volume of the enclosure in cubic feet or cubic meters: measure Length x Width x Height (LxWxH) taking into consideration the curvature of the hull
- Select a manual only model from the chart that meets or exceeds the calculated volume of the protected enclosure

What's included?

- Fire Suppression System
- System Mounting Bracket
- Suppression System Indicator Light
- System Installation & Instruction Manual

Accessory items to consider

- Manual Discharge Cable
- MSRS (Machinery Shutdown Restart System) & Display Panels
- High Temperature Sensor

System Model Chart
